- Description updated

#5 - 09/17/2022 06:27 AM - jacobk

Not sure if it's intentional or a bug, but Haketilo seems to just choose a frame randomly when deciding what to show in the popup.

#6 - 09/17/2022 10:08 PM - koszko

That'd be a bug :(Do you have some steps to reproduce?

#7 - 09/20/2022 05:30 PM - jacobk

To reproduce:

With pretty much any version of the GitHub registration fix, go to github.com/signup while not signed in, and click on the extension icon. Some of the time, you will see github.com/signup, but sometimes you'll see an iframe URL (from octocaptcha.com or api.funcaptcha.com) instead.

Go to <https://stackoverflow.com/users/signup> without a fix loaded (or with the cookie notice fix installed), possibly also has to be while not signed in, and click on the extension icon. Sometimes you'll see the [stackoverflow signup URL](https://stackoverflow.com/users/signup), but sometimes you'll see a [google.com recaptcha URL](https://google.com/recaptcha).

Thank you.

I [just fixed it](#). I hope it will work under Ungoogled Chromium as well (I am temporarily unable to test with that browser)
