Description

All it takes to do this is to add "https://.app.box.com/v/" to the matched URL patterns (in addition to "https://.app.box.com/s/"). I'm not sure what the difference between these 2 URL schemes is supposed to be (I haven't looked at how the official app displays them.), but the existing fix seems to work well with the v URLs already.

I have uploaded a commit that adds these patterns here:

<https://codeberg.org/JacobK/hydrilla-fixes-bundle/commit/42a4a3998c54a0faa30e0d9bb829a75055199fb6>

(While looking for public test cases for this, I also found an f type URL (<https://dronepadmedia.app.box.com/f/a14b5488396345c3ab0466d805636b83>), a folder (<https://app.box.com/s/5fb14p1yyjhak97rgbmksy81a2f5nehn>), and a folder inside a folder (<https://app.box.com/v/b00ks>).

History

Oops, I didn't change the version number of the mapping_and_resource, here's an updated commit:

<https://codeberg.org/JacobK/hydrilla-fixes-bundle/commit/b24bcf3346c3d2662605821886da7351f6704974>

#2 - 09/17/2022 08:47 PM - koszko

- Subject changed from [Box] Support s type URLs to [Box] Support v type URLs

Thanks, I applied your change.

I am unfortunately not going to work on supporting folders rn as I need to prioritize other things. Feel free to open a new issue in case you resolve it by yourself, I'm closing this one :)

#3 - 09/17/2022 09:13 PM - koszko

- % Done changed from 0 to 100

- Status changed from New to Closed

#4 - 10/29/2022 05:25 AM - jacobk

Based on the presence of `postStreamData["/app-api/enduserapp/shared-item"].vanityName`, I think the v stands for "vanity", and I think the only difference is in how the URL is displayed. Vanity URLs have a `sharedName` also, and you can make a URL from this, but it is a redirect to the vanity URL.
