

Haketilo - Feature #34

improve CSP injection blocking

07/01/2021 01:07 PM - koszko

Status: Closed	Start date: 07/01/2021
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Description	
There are some possible pathological cases like <script> before <head>. We should make sure CSP <meta> tag we injects works for all corner cases.	
Keep in mind we also have another script-blocking mechanisms employed simultaneously, so this is not as bad as it might seem.	

History

#1 - 08/13/2021 12:51 PM - koszko

- Description updated

Update: we might be able to just inject <meta> at the very beginning of the document. Browsers seem to be able to deal with such oddity (they actually create a <head> for it)

#2 - 09/09/2021 12:51 PM - koszko

- Status changed from New to Closed

Can be considered done as part of [#78](#)
