Haketilo - Bug #42

Nonce not set on injected scripts

07/02/2021 02:02 AM - jahoti

Status:	Rejected		**Start date:**	07/02/2021
Priority:	High		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				

Description

Update: rejected as this the expected behaviour, and is present at least as far back as commit 86ad1c6e0cf8a9ec3a529be10d7c7d1bfdf4620e. Reference

Scripts injected into a page by the extension have their "nonce" attribute set to "" rather than the appropriate nonce. This sometimes causes them to not execute (conditions for failure are not clear).

Issue seems to have been introduced in commit 261548ff184926567a623e90df7954aeef842d59.
