

## Haketilo - Feature #73

### [Roadmap 6] Implement a permissions system

08/02/2021 11:47 PM - jahoti

<b>Status:</b>	New	<b>Start date:</b>	08/02/2021
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	50%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
This seems to be a common component of several security- and feature-related powers now. It probably deserves a standardized interface in order to reduce the burden of adding or removing various permissions in the future.			
Please share your thoughts.

Blocks Site fixes - Site script request/donation #114: [script donation] code...		<b>New</b>	<b>03/04/2022</b>

#### History

##### #1 - 10/01/2021 05:21 AM - jahoti

Could potentially draw from or just use <https://jshelter.org/> alongside Haketilo (still experimental).

##### #2 - 10/01/2021 12:05 PM - koszko

If JSHELTER turns out to be able to also work properly on sites modified by Hachette, running it in parallel would be the least problematic approach.

As to otherwise drawing from it... It might be an option, although it'll still require a serious bit of work. I personally don't consider this<sup>1</sup> a priority as long as the scripts we're providing are somewhat trusted

---

1. By "this" I mean security mechanisms like those in JSHELTER. Permissions for CORS bypassing are still needed ↩

##### #3 - 10/02/2021 04:12 AM - jahoti

As to otherwise drawing from it... It might be an option, although it'll still require a serious bit of work. I personally don't consider this<sup>1</sup> a priority as long as the scripts we're providing are somewhat trusted

It definitely isn't at this stage, or possibly even into the future; I just wanted to make sure I didn't forget the idea.

Ideally there won't be any interference between the two and, as you note, we can have many of the benefits for no work!

**#4 - 02/24/2022 10:57 AM - kozzko**

- Subject changed from *Implement a permissions system* to *[Roadmap 6] Implement a permissions system*
- Description updated
- Parent task deleted (#71)

**#5 - 02/24/2022 12:49 PM - kozzko**

- Blocked by Feature #88: *[Roadmap 6][Milestone] Allow payloads to also specify CSP rules that should be used instead of the original ones served by page* added

**#6 - 05/11/2022 03:39 PM - kozzko**

- Blocks Site script request/donation #114: *[script donation] codeforces.com* added

**#7 - 06/21/2022 02:27 PM - kozzko**

- % Done changed from 0 to 50

This is now part of Hydrilla (with just 2 kinds of permissions now). Haketilo will gain support for this in 3.0.

**#8 - 06/21/2022 02:27 PM - kozzko**

- Blocked by deleted (Feature #88: *[Roadmap 6][Milestone] Allow payloads to also specify CSP rules that should be used instead of the original ones served by page*)
