

Haktilo - Feature #8

add some good, sane error handling

07/01/2021 12:03 PM - koszko

Target version:	
Description Storage accesses might sometimes fail (for example due to all available storage space being used up) and we could inform the user about it through some popup. There might also be some other places in the code where we could better handle errors (failure when fetching remote scripts?). We should thoroughly consider what is the most appropriate way to handle each possible exception.

Also what happens when the hash of a remotely loaded script doesn't match what is set- some update mechanism perhaps?

#2 - 02/18/2022 12:58 PM - koszko

- % Done changed from 0 to 100

- Status changed from New to Closed

With the new UI I made many kids of errors result in a message being shown. Those error messages are even tested using Selenium
